AVANTI

DC

BETTER THAN THE BEST

The avanti has been benchmarked to the most desirable supercars of the world but the essence of the product has been engineered for indian ground realities. The attempt has been to infuse it with a delicate balance of often contradictory attributes of distinctiveness and agelessness, young and sophisticated, theatrical and reliable, sensuous and mature. All qualities that ensure the avanti has a undeniably great stance and composure to ignite the flames of passion and a lust to possess it.

CAUSE **THREE** IS A CROWD

The Avanti immediately connects with the driver, so that he or she becomes almost an extension of the car. It's 1+1 configuration is designed to wrap around the driver. The cockpit's design provides visibility, minimal distractions and close-to-centre-of-gravity seating with rigid seat frames and structure. The fascia has been intentionally kept as low as possible and free from clutter to increase the forward view.

UNDER THE SKIN

The avanti is more than just a pretty face. Over a Million man hours and after huge investments that include countless sleepless nights. The avanti is so much more than just a pretty face. It's thoroughly researched, tested and verified in all aspects - Performance, Safety, Reliability and of course it's minimal carbon footprint.

On the driving side the 250 BHP engine is mated to a slick 6 Speed gearbox that will offer you countless hours of pure fun. Independent softly sprung suspension all around and a class-leading 155mm of clearance means that the avanti is truly INDIA ready.

All around disc brakes holding gorgeous 20" alloy wheels wrapped in exotic ITALIAN rubber will make sure the avanti stops where you want it to.

THE DREAMER

THE COMPANY

It is said that if you love what you do for a living then you will never see it as 'Just a job'. By that maxim Dilip Chhabria has possibly never ever worked a day in his life. For him the business of car design and modification is an amalgamation of his passion, hobby and work.

In DC we see the marriage of an artist's sensibilities and an engineer's mind. He infuses each of his projects with an aesthetic awareness while simultaneously pushing the machine's capabilities to a new level. Every DC creation is a signature extension of the artist's personality.

DC is also an accomplished painter and sculptor. The DC Art Gallery in major cities showcases his work which has been executed in a variety of mediums from oil to acrylic. For the propagation of his unique thinking and approach to automotive design DC has partnered with the D Y Patil Group to start DYPDC Center for Automotive Research and Studies which will nurture the next generation of Indian automotive designers.

Behind every successful business is a person whose passion and vision drives every facet of the organization, DC has become the authority in automotive design in India by single-mindedly following his passion.

WHERE WE COME FROM

It takes a special kind of zeal to follow your vision, but it takes even more courage to close down a successful business to pursue a bigger dream. He took the entrepreneurial plunge and started creating automotive accessories for the mass market.

They say passion breeds its own success and soon enough DC's accessories became a favourite for automotive enthusiasts. Within a decade it became the largest accessory manufacturing outfit in the country. But this canvas wasn't big enough for DC. From the start he knew that his goal was to design a whole car and not just some of its parts.

DC Design was founded in 1993 with the dual aim of redesigning and modifying mass market cars to create one-of-a-kind automotive beauties for automotive connoisseurs as well as offering design and prototyping services to the OEM automotive sector.

And a legend was born. DCD has produced more than 600 unique design cars; from supercars to a complete re-haul of the humble Ambassador. DCD has also provided design and prototyping services to the likes of Aston Martin, BMW, GM and Renault. Today DCD also designs and refurbishes aircraft interiors. DCD is now synonymous with bespoke luxury and avant-garde automotive design.
