

The S-Class

Mercedes-Benz
The best or nothing.

This changes everything. The S-Class.

Roll up those sleeves and get stuck into the job to be done – while sitting in the lap of luxury. Roll up the garage doors on the grey light of dawn ready to work hard – step out onto the red carpet at night ready to play hard. View the rising sun from the driver's seat – and the setting sun from the reclining seat in the rear. It's time to see the world from a new perspective. Because the S-Class changes everything. It changes the way you work, the way you play, and the way you travel. It brings together the worlds of work and leisure

at a hitherto undreamed-of level. The choice of materials, the degree of perfection and exclusivity in the interior surpass expectations for a vehicle of this class. And it is simply in the S-Class's DNA[®] to shine with technical innovations hitherto unseen in a car. The lighting, using new technologies and a 360° sensor system, illuminates the surrounding with a speed and precision never seen before. Change is coming your way. You will see it, sense it and experience it for yourself.

The first star.
Shining in the morning light too.

The sun lifts the veil of mist from the road, the contours of the S-Class stand out in sharp relief.
The upright radiator grille topped by the unmistakeable star herald in the new dawn. A new day is breaking
– and with it, a new era of mobility.

Prepare to arrive in the future
without covering a single metre of road.

The quickest route between two
points on your agenda.

When can a moment not be surpassed? Or a car? Intense light showcases the immaculate trim. Richly contrasting materials blend to form harmonious surfaces. Exclusive design sparkles with optimum functionality and a predilection for detail. Your glance sweeps through the generous space and your hands rest for a few seconds on the leather of the seats. Before you alight, sure in the knowledge that the perfect day is simply a question of the right vehicle.

Equally at home
with black tie or white collar.

The S-Class will always leave you
in control, never on your own.

Where the best
deals are done.

Light has never been so directed.

There is not much we don't try in our quest to revolutionise every area of automotive engineering and be the first to bring new technologies to the street. So why not put light in the spotlight, and work on it until it is efficient and intelligent enough to be fit for an S-Class? And we don't just mean that the new LED-based lighting technology must illuminate the road surface better, the light temperature must be agreeable and the lights must use up to 25 percent less energy compared to conventional headlamps. S-Class lighting must do more than that. It must interact with the various sensor and assistance systems,

such as the Adaptive Highbeam Assist Plus. With the result that if an oncoming vehicle or a vehicle ahead is detected, the area it occupies is simply blanked out in the main beam light cones of the LED headlamps. And when at a standstill, at traffic lights for example, the brake light is automatically toned down so as not to dazzle anyone behind. The more than 190 single-chip LED diodes ensure even greater comfort and safety in traffic. So, light can do a whole lot more than just be illuminating. In a Mercedes-Benz at least.

Sight machine.

As soon as it gets dark, the eye of the S-Class comes to life. The full-LED headlamps go into fully automatic action and reaction, illuminating with precision the areas where they're needed, exactly when they're needed. You can even opt to take the shine off oncoming traffic if you want to avoid dazzling them. This gives you optimum vision in practically every driving situation – and above all, a good feeling about where you're headed.

Hot Stone Massage.

Travel to the office and want to take a massage as you go? No problem in the S-Class. Just say the word and your very own car will pamper you with an especially soothing ENERGIZING massage function that even adds a touch of brilliance with a Hot Stone Massage function. It's all down to the Seat Comfort package featuring six massage programmes. Talking of which, all seats in the S-Class offer a level of comfort that's second to none.

360° Camera.*

The 360° camera provides you with visual support when parking and manoeuvring, and also in situations of restricted visibility when driving off road.

The system keeps all four sides of the vehicle in view and therefore enables consistent all-round visibility, including a bird's-eye view – a top-down view of your car and its immediate surroundings.

*Available in S 500.

Engines

The rule of the road today: you can't have refinement without efficient technologies. Mercedes-Benz petrol and diesel engines are therefore lighter and measure out fuel extremely precisely. In this way they bring together a sense of responsibility and commitment, without compromising on driving enjoyment – no matter what drive system you opt for.

8-cylinder V-engine. Refinement, driving pleasure and responsibility – embodied by the petrol engine with 338 kW. Thanks to twin turbocharging and intercooling, the S 500 has huge reserves of power and can accelerate from 0 to 100 km/h in only 4.8 seconds. The engine may give off its typical, unmistakably sonorous and cultivated sound, but fuel consumption stays unusually low.

The 8-cylinder petrol engine is powerful, refined and efficient.

Note : Not conducive for driving in Waterlogged roads with still water depth more than 25 cm.

6-cylinder V-engine. The S 350 CDI brings high output with low fuel consumption in one engine. This is made possible by the systematic use of lightweight materials deploying aluminium parts and precise, spray-guided piezo injection. The S-Class 350 CDI with a V6 engine delivers an output of 190 kW power.

Note : Not conducive for driving in Waterlogged roads with still water depth more than 25 cm.

The 6-cylinder diesel engine combines high output with low fuel consumption.

Transmission

The consumption and efficiency-optimised 7G-TRONIC PLUS automatic transmission stands out for its high level of efficiency, ultra-smooth gear changing, dynamic response and reduced noise levels.

7G-TRONIC PLUS. This 7-speed automatic transmission system combines a high level of driving comfort with driving enjoyment and efficiency. The seven forward gears provide a wide gear ratio range, but with small engine speed step-ups between the individual gears. This leads to ultra-fast gear changing with pleasantly smooth transitions. As 7G-TRONIC PLUS can skip over individual gears, multiple downshifts are possible, to give powerful spurts of speed. The driving modes “Economy”, “Sport” and “Manual” allow the style of changing – from economic to dynamic – to be selected. Using the “Manual” mode, drivers wishing to adopt a more sporty style of driving can change gear manually via the DIRECT SELECT steering wheel shift paddles – just as motorsport drivers do.

DIRECT SELECT. The DIRECT SELECT gearshift system includes the DIRECT SELECT lever on the steering column, with which the transmission can be changed between the shift modes “P”, “R”, “N” and “D”. In addition to this, the gear can be selected manually via the DIRECT SELECT shift paddles.

DIRECT SELECT lever on steering column. The driver can also change up or down a gear manually using the additional shift paddle.

Chassis & suspension

The S-Class is fitted with the latest-generation, enhanced AIRMATIC suspension system as standard.

AIRMATIC. Working in combination with a stepless damping control system, this air suspension system ensures superlative road roar and tyre vibration characteristics and driving dynamics. The damping is adjusted on each wheel to the actual driving situation and can be set to be comfortable or sporty, as desired.

AIRMATIC air suspension ensures comfort and agility through its ability to raise and lower the suspension settings as required.

Integral safety concept

We are driven by the vision of accident-free driving. Our integral safety concept takes us a step closer to achieving this. It is a comprehensive approach which paves the way for new, synergy-based technological solutions, a case in point being the “Mercedes-Benz Intelligent Drive” system which combines comfort and safety.

As the inventor of the motor car we feel a special responsibility for road safety. That's why we became the first car manufacturer to develop an integral safety concept that seamlessly combines active and passive safety measures to provide comprehensive protection. The holistic approach is divided up into four phases and offers safety solutions for every situation. These include systems for safe driving, which help prevent hazards by providing timely alerts and assistance. Our unique PRE-SAFE® system is triggered in response to danger and activates anticipatory measures to protect the occupants. If a collision should occur despite

these precautionary measures, other technologies provide the required protection. We have also considered the time immediately after an accident by developing solutions that can prevent serious injury and enable the emergency services to provide rapid assistance. A selection of these technologies for the “Safe driving”, “In the event of danger”, “In an accident” and “After an accident” phases is presented on the pages which follow.

Safe driving: Night View Assist Plus.* Only 20 percent of all traffic travels at night, yet 40 percent of fatal accidents occur during this time. Night View Assist Plus makes it

possible for the driver to spot people or animals sooner in the dark. They are clearly shown up in the multifunction display in the instrument cluster. The spotlight function causes pedestrians on either side of the road who might be at risk to be drawn to the driver's attention quicker, by flashing them four times in quick succession, which also makes the pedestrians themselves aware of the hazardous situation. The night vision screen switches itself on as standard if a risky situation has been detected.

In the event of danger: PRE-SAFE® system.

The system can recognise critical driving situations in

Night View Assist Plus highlights any people it has recognised and helps the drivers to react quicker to dangers by night.

*Available in S 500.

PRE-SAFE® system.

advance and activate measures to protect the occupants if there is a risk of an accident. This includes activating the reversible belt tensioning or the automatic closing of open windows.

In an accident: airbags. The S-Class has eight airbags in total. In addition to the impact bags, there are sidebags and windowbags for the driver and front passenger. There are also sidebags in the rear.

Measures after an accident. In order to reduce consequential damage and, where necessary, to support the rescue of the occupants, Mercedes-Benz has developed further measures.

These include the automatic engine cut-off or the activation of the hazard warning lamps and the emergency interior lighting. The central locking also opens automatically, and crash joints between the door and the wing make it easier to open the doors after an accident.

ATTENTION ASSIST. ATTENTION ASSIST helps you during long, monotonous journeys, such as on highways. It is active in the range of 60 km/h to 200 km/h. If ATTENTION ASSIST detects typical indicators of fatigue or increasing lapses in concentration on the part of the driver, it suggests taking a break. The inbuilt navigation system will also suggest the

nearest coffee shop for you. The system determines the attention level of the driver depending on the setting selected: If the setting is selected as Standard, the sensitivity with which the system determines the attention level is set to normal. If the setting is selected as Sensitive, then the sensitivity is set higher. The attention level detected by Attention Assist is adapted accordingly and the warns the driver.

A total of eight airbags can protect you and other vehicle occupants in the event of an accident.

ATTENTION ASSIST

Assistance systems

The S-Class does not just influence its surroundings – it records them. Stereo and infrared cameras, ultrasound sensors work together to give all-round vision, thereby making driving safer and more relaxing.

360° camera.* This system allows you to park and manoeuvre, giving you an all-round near real-time view using four networked cameras. The vehicle and its surroundings can be displayed in a bird's-eye view in the COMAND Online display; and obstacles below the level of the windows are also displayed to the driver.

Parking package. Active Parking Assist with PARKTRONIC and a reversing camera makes finding a parallel or car park parking space and parking in it easier. If so desired, it will automatically control the vehicle in parking spaces and spares the driver the steering and braking actions. If the driver selects reverse gear, and accepts the space suggested, Active Parking Assist automatically performs the required steering movements to manoeuvre the car into the space at a speed of up to 10 km/h. All the driver has to do is operate the accelerator and brake pedals. The parking manoeuvre is completed in a maximum of seven moves.

LED Intelligent Light System. So as to give the best possible view on country roads and motorways, when turning into side roads, on bends and in fog, the low-beam headlamps of the LED Intelligent Light System adapt automatically to weather, light and driving conditions. In main beam mode, Adaptive Main Beam Assist Plus allows the road surface to be illuminated in the main, without dazzling any other road users. Part of the light cone is blanked out for oncoming vehicles or traffic ahead. But the sides of the road remain illuminated by the main beam. Adaptive Main Beam Assist Plus dims itself for road signs that reflect its light back strongly, so as to avoid dazzling the driver. In these ways the LED Intelligent Light System makes an important contribution to safe driving. This efficient technology is impressive for its low energy usage, its longevity and for its pleasant white light, which is close to the daylight spectrum.

360° camera

*Available in S 500.

The stereo camera surveys an area of up to 500 metres ahead of the car and detects where there are parking spaces.

Adaptive Highbeam Assist Plus always provides the best possible headlamp range automatically, thereby improving visibility for the driver.

*Please read the disclaimer.

Multimedia systems

On the way to work or working already? Different media requirements and options have already been taken into account with the S-Class. The new Mercedes-Benz Connect functions can be operated just as intuitively as the familiar ones.

COMAND Online. Navigation, phone, audio, video, internet – with the COMAND Online control and display system, the driver has these and many further functions in view and under control. Data is presented on a high resolution 31.2 cm colour display. Operation is simple and intuitive. A fast hard disc navigation system with realistic topographical map display will get you to your destination

in a relaxed style. And a DVD player, radio, 10 GB storage for audio and video files and interfaces allows external devices to be connected and ensure that you won't be short of entertainment.

COMAND Online displays all the information and communication functions for the S-Class in a high-resolution colour display.

Burmester® Surround Sound system – impressive sound quality for every occupant

13 high-performance speakers, a 9-channel DSP amplifier with a total output of 590 watts and amplifier/speaker systems configured specifically for the vehicle make for the first-class Burmester® “feel-good sound”. If required, this impressive listening experience can even be further upgraded. The Surround function generates virtual surround sound from a mono or stereo music signal to maximise the spatial effect. Front/Rear optimisation allows the sound to be specifically adjusted for the front or rear seats. Thanks to highly advanced vehicle noise compensation (VNC), the sound quality is maintained despite driving noises so that the best possible musical enjoyment is guaranteed at all times – whether on the motorway or in town. The Burmester® Surround Sound system combines digital and analogue filter elements. The systematic use of analogue diplexers in the medium and treble ranges ensures an extraordinarily expressive and natural spatial sound.

Individual Entertainment in the rear. DVD films, the internet, video games, music – Individual Entertainment allows passengers in the rear to create their own personal entertainment programme. Two 25.4 cm displays with cordless headphones provide outstanding image and sound quality.

Rear seat entertainment system: 10 inch screen with DVD player, wireless headphones and COMAND remote control

Seats

Sitting in the S-Class is not just comfortable, it can also increase your ability to keep driving well. Quite apart from individually climatised seats plus 60 possible settings from the seating area through to the steering column, there is a massage function and a special relaxation cushion for the rear seat.

ENERGISING massage function. Six different programmes are available, including two hot relaxing massage programmes, which can relax, stimulate or mobilise you according to your wishes. “Strong” or “weak” intensity levels can be set. The speed and effect varies according to programme. Each programme lasts between 12 and 15 minutes.

Climatised front seats. The seat heating can be switched on on cold days to provide comforting warmth. Seat ventilation and seat heating can be set at three levels by means of a switch.

The ENERGISING massage function is operated through COMAND Online.

Memory package.* If there is a frequent change of driver or front passenger, the Memory package makes life particularly convenient. Up to three different positions for the front seats, steering column and exterior mirrors can be set electrically and saved, and recalled at the touch of a button.

Chauffeur package. The front passenger seat can be moved forward electrically by a further 77 mm. This makes the journey for the rear passenger sitting behind a great deal more relaxed. The appreciably larger footwell makes it easier to find a position in which to rest; this is supported further

Chauffeur package

by a footrest that can be electrically extended.

Power rear seats. The power rear seats ensure travelling is always comfortable. Their backrests can be reclined, so that passengers can lean back and relax. The memory function allows up to three individual positions to be stored for each seat, and retrieved within seconds. The memory programming includes all seat adjustment functions such as seat height and fore-and-aft position, seat cushion angle and depth, backrest angle. Operation is intuitive, using ergonomic switches in the door control panels. The front passenger seat can also be adjusted from the rear, e.g. to increase legroom.

*Front Memory package available in S 500.

*Please read the disclaimer.

*Please read the disclaimer.

Light and climate control

Perfection means attending to everything, even in the air. In this way, it does not need to be down solely to the ambient lighting to create a first class relaxing or stimulating S-Class atmosphere.

Ambient lighting. With its pleasant and indirect light, the ambient lighting creates a unique feeling of well-being throughout the whole of the interior. Seven different colours and five dimming levels are available to create a personalised lighting ambience.

7 Ambient lights – dawn red, morning white, daylight white, twilight purple, late glow red, sunset orange, moonlight blue.

THERMOTRONIC automatic climate control.

With four climate zones and three air flow settings, the automatic climate control creates an individual climate of well-being on board. The driver and passenger can set their temperatures independently of each other. There are five different and separate settings for the temperature of the foot wells in the front. An active carbon filter for fine dust keeps dust, soot and pollen at bay and reduces smells and pollutants in the air.

Roof Systems

The roof systems and tinted side windows on the S-Class provide the ideal conditions for working and relaxing. If so desired, the panorama roof will open up in stages to reveal the sun. The tinted panes of glass keep both its heat and the unwanted attention of people outside the vehicle at bay.

Panoramic sliding sunroof. With its large glazed areas, this roof system provides a particularly bright and friendly ambience in the interior. It consists, in the rear, of a fixed panoramic glass sunroof; and at the front of an electrically operated outer sliding glass roof. In addition, two electric roller blinds afford the passengers some shade when the sun is shining strongly. Two practical features of the panoramic sliding sunroof ensure a high degree of drive comfort. The glass roof automatically adjusts the height at which it is raised to the current vehicle speed. At higher

speed the glass roof lowers itself, thereby lowering the noise level and air circulation. The opposite occurs at low speeds. The panoramic sliding sunroof also reacts by itself to rain: if it is open at the time, it automatically goes Comfort 65 into the tilt position and stops water getting into the interior. When the vehicle has been switched off, the panoramic sliding sunroof can be opened and closed from outside the vehicle. The “summer opening” and “convenience closing” functions can be activated by the electronic ignition key, by pressing the

appropriate buttons for a longer time. If the interior has been heated up by the sun’s rays, this function can be used to ventilate the vehicle prior to getting in. To do this, the side windows open and close in addition to the glass roof. The panoramic sliding sunroof has an obstruction sensor to prevent a hand, for example, being caught in it. If the system senses something in the way, it immediately ceases closing the roof and retracts it a little, along with the sunblinds, if appropriate.

Genuine Accessories

It doesn't take many words to sum up the position of the ultimate S-Class - this is a car at the forefront of automotive development. Whatever you dream of in a Mercedes-Benz, you will find it in its form in the S-Class. It's hard to believe that this brochure could help top that. But it's true: the broad range of Mercedes-Benz genuine accessories allows you to add a new dimension to the S-Class's legendary perfection: individuality.

Rear Spoiler

A rear spoiler from Mercedes-Benz significantly boosts the car's aerodynamics. Tailored to the contours of the vehicle for a sporty design. Top-class materials produce a high-quality feel. Colour options precision-tailored to the vehicle. Simple to retrofit: secured using double-sided adhesive tape.

All Season Floor Mats: Set of 2 –Driver/Co-Driver material, designed for heavy use.

Latest design with recessed areas and raised edges with distinctive Mercedes-Benz star logo.

Code - A2227930088

Code - A22268045488S85

Coolbox

Not only cools but warms too. Cools to up to 20°C below ambient temperature – to max. -2°C. Can be switched to warming function. Robust, highly insulated hard case with fabric cover, outside pockets and padded shoulder strap. Capacity: 24 litres. Can be connected to 12 V socket in vehicle or to 230 V power source via separately available rectifier.

Rectifier

Allows the Coolbox to be connected to a 230 V socket at home.

Code - A0008204206

Code - A0009820021

Genuine Accessories

Stowage crate

A secure hold for items which are prone to tip over or slide around, e.g. shopping bags.
Adjustable partitioning elements allow crate to be divided into max. four sections.

Code - A0008140041

Concertina Load Sill protector

Protects the rear of the car from scratches when you're loading/unloading the vehicle boot.
The Load Sill Protector also prevents dirt from the car from getting onto your clothes.
Practical design – can be connected to shallow boot tub or reversible mat.

Code - A2126800246

Luggage Securing Feature

This highly flexible, padded luggage-securing feature, with Mercedes-Benz lettering, helps create order in the boot/load compartment. Special Velcro fastenings provide a secure hold at the sides and prevent objects from sliding around during the average journey.

Code - A0019871414

Luggage Net – Floor of Load compartment

Mercedes-Benz luggage nets – for a tidy and uncluttered interior. Versatile and, once fitted, indispensable. The net is designed to secure small items and lightweight objects in place, preventing damage during transport. All-round flexibility: the black stretch nylon net hugs the contents and has a high capacity. Tidy and practical accessories – for your Mercedes-Benz.

Code - A2228680074

Genuine Accessories

Shopping Crate

A must for any boot/load compartment: the practical shopping crate from Mercedes-Benz – a flexible transport and stowage accessory. When not in use, it can be folded flat and stowed away in the load area. It comes with Mercedes-Benz logo and lettering.

Code - B66470995

Mud Flaps

The mud flaps protect the sides, rear and underbody of the vehicle from scratches and damage from loose chippings. They also help protect the following traffic from loose chippings, splash water and dirt. Precision-tailored to the contours of the vehicle – do not affect the vehicle's sporty looks. Material: extremely hard-wearing, durable, UV-resistant. It can be painted in the color of your choice.

Code - A2228900078

Mercedes-Benz Child Safety

Mercedes-Benz child seats offer optimum protection in the event of an accident. Child seats are tested and inspected to exacting Mercedes-Benz specification.

“BABY-SAFE plus II” child seat Deep, moulded seat design offers extra side-impact protection for optimum safety. Special padding, designed to protect particularly vulnerable body areas of children up to around 15 months (up to 13 kg).

“BABY-SAFE plus II” child seat

“DUO plus” child seat Optimum safety for children between the ages of around 8 months to 4 years (9 to 18 kg). Fitted as standard with top tether, an additional belt for securing the head section, a height-adjustable shoulder belt, ventilation channels and ISOFIX attachment.

“DUO plus” child seat

“KIDFIX” child seat Booster seat for optimum side-impact protection, with height adjustable backrest. The “KIDFIX” seat is secured using the 3-point seat belt and ISOFIT attachment points. For children between the ages of around 3.5 to 12 years (15 to 36 kg).

“KIDFIX” child seat

Service

The luxurious experience of driving a Mercedes-Benz is converted into a fulfilling ownership experience with a range of exclusive services and special programmes.

Cost of Ownership

There has been a paradigm shift in the buying preferences of Indian consumers over the years, even for the luxury products. The purchase decision not only dwells around cost of acquisition but also the total 'Cost of Ownership' (COO). Amongst the key components of COO in cars are the routine service jobs and the unplanned repair expenses post the warranty period. We are now offering highly affordable Service Packages and Extended Warranty Programmes which includes

a **standard 2 year warranty along with a 1 year extended warranty** and is considered as the most competitive packages in its class. All in all, we provide you with a controlled Cost of Ownership while you benefit from the legendary Mercedes-Benz service quality.

STAR CARE

Experience complete peace of mind when you drive the Star. STAR CARE programme offers peace of mind drive for you during warranty period and beyond. While our cars are covered for warrantable repairs up to 3 years without any mileage limitations, as standard, you can also buy STAR CARE Plus programme, offering 4th year extended warranty. Additionally, the programme enhances the resale value of your car.

Extended Warranty that guarantees complete peace of mind

STAR EASE

STAR EASE Service Package gives you the freedom to relax behind the wheel and puts your mind at ease with its range of unique benefits such as defined cost of maintenance and priority handling. STAR EASE Comprehensive package covers essential jobs related to periodic service (viz. oil, filters, consumables, etc.) along with coverage for brake pads, brake discs, wiper blades and wheel alignment & balancing, for a contracted period. For further details on products and pricing, please contact your nearest Mercedes-Benz dealer.

The maintenance of your Star is just as peaceful as driving it

On-Road Assistance Programme

As part of our ongoing commitment to you, Mercedes-Benz On-Road Assistance is designed to enhance your overall Mercedes-Benz ownership experience by providing you with 24 hour On-Road Assistance. Mercedes-Benz is the only Luxury car manufacturer to offer round-the-clock On-Road Assistance for **3 years** from purchase of vehicle as a **standard offering**. Peace of mind motoring – guaranteed.

Always at your service

Conditions apply.
