

**VOLVO S60**  
CROSS COUNTRY

# WE'RE VOLVO CARS.

*We put people first.*

We're Swedish. Scandinavian designers always start with the person who's going to use an object and ask, "What can we do to make this person's life better, easier or more comfortable?" We've always used this philosophy when we design our cars. So, while other car manufacturers might start with technology and try to squeeze people in around it, we begin by designing our cars around you. We ask what you need, and then use our technical skills to make your life easier, better, safer and more beautiful. Form follows function, and when you design a car inside and out with people in mind, it looks naturally beautiful. We think that looking at and interacting with our cars should make you feel great, every day. Designing cars around people has led to many innovations over our

88-year history. You know the three-point safety belt in your current car? That was our invention from 1959. And now we're working towards our vision to design cars that should not crash. In the shorter perspective, our aim is that by 2020 nobody should be killed or seriously injured in a new Volvo. Of course, you'll already benefit from this research in your current Volvo. We've addressed a few environmental issues, too – in 1976, we developed the lambda sond – a sensor that monitors exhaust gas, reducing emissions and boosting performance as well as economy. It's still part of every petrol-engined car in the world. Innovation is at the core of Volvo Cars – it's because of where we come from.

For drivers looking for luxury with thrills, we present the Volvo S60 Cross Country, a touch of Swedish luxury for your adventurous spirit. A unique combination of saloon styling and rugged packaging that take you beyond usual city roads. The S60 Cross Country conveys an imposing, muscular presence that echoes its capable nature. A heightened sense of control, with increased ground clearance and sturdy construction to give you an in-command driving position and the confidence to push the limits. This sporty sedan with a striking crossover design stands out from the crowd. Its torque vectoring and Corner Traction Control enhance the sporty

driving experience, while the new Cross Country wheels and high profile tyres add comfort and protection. Seats have been a Volvo strength since the 1970s, when we enlisted orthopaedic surgeons to help us develop an ergonomic, supportive shape that ensures you arrive fresh and relaxed after even the longest journey. The roomy, leather interiors in the S60 Cross Country with ergonomic sports seats speak of pure luxury, while the integrated tailpipes reflect its sporty dark side. With a 201mm ground clearance, active bending Xenon headlights, black fender extensions and scuff plates, this sedan is equally at home on dirt roads as it is on the tarmac.

*“Enhanced control and a more engaged driving experience — in all weather, on all terrains.”*

## VOLVO S60 CROSS COUNTRY

*A unique combination: rugged looks and capability with a daring attitude.*

The Volvo S60 Cross Country offers a sleek, stand-out style with All-Wheel Drive and an additional 65mm of ground clearance.

It possesses a unique combination of coupe-like style and tough capability to take adventurous drivers further, whatever the weather and wherever the destination. Along with a raised ride height, the Volvo S60 Cross Country's black fender extensions and scuff plates indicate that this is a capable adventurer. However, this

ability on rough roads and forest tracks doesn't come at the expense of an engaging, sporting drive on smooth tarmac: with Corner Traction Control, the Volvo S60 Cross Country gives you pure driving pleasure on twisty country roads. Safety, as always, remains our priority – Active High Beam headlights provide excellent visibility at night, and in the Volvo Cars tradition of caring for other road users, you can keep them on high beam and they will never dazzle other road users.

Select Hill Descent Control for a smooth and confident descent on a steeper terrain – all the driver has to do is steer while the Volvo S60 Cross Country controls the speed and the braking. Inside, sculpted sports seats keep you firmly in place through the corners. And Sensus Connect offers full connectivity with entertainment and navigation apps. The Volvo S60 Cross Country is a completely original all-rounder.

*“We’re famous for our seats  
– they’re a proud tradition for us at Volvo Cars.”*

We've designed the cockpit around you, the driver. Get inside and feel in complete command as the dashboard gently angles towards you. We were inspired by high-performance motorbikes when we came up with the idea of a single round instrument flanked by two smaller dials. Then, we carefully sculpted the three-spoke steering with the aim of giving you a very physical sense of connection between your car and the road. But, where you sit is even more important.

“We’re famous for our seats,” says Stefan Sällqvist, “they’re another proud tradition for us at Volvo Cars. Our sport seats look fantastic and, true to our unrelenting commitment to ergonomic design, you’ll be able to drive for hours sitting in it without getting tired. It also has great side support all the way from your thighs to your shoulders, so the seats keep you firmly in position even when you’re cornering fast.”

No need to take your hands off your steering wheel as you shift up and down the automatic gearbox in manual mode – just flick through the gears with our optional gearshift paddles. You’ll be in total command of your car, with both hands on the wheel. And quicker gear changes give your drive an additional edge when you’re in the mood for upping the tempo.

*“Our vision is to design cars  
that should not crash.”*

## INTELLISAFE

*Intuitive safety by Volvo Cars.  
For you, and for those around you.*

At Volvo Cars, safety is an intrinsic part of our DNA. We've invented some of the world's most pioneering life-saving technologies – such as the three-point safety belt that's been acknowledged for being one of the most important innovations of mankind. But we aim higher. Our vision is to design cars that should not crash. In the shorter perspective, the aim is that by 2020, nobody should be killed or seriously injured in a new Volvo.

IntelliSafe is our approach for a more harmonious relationship between cars and people. To achieve this, we have infused your Volvo with smart, intuitive innovations for a safer drive. And the IntelliSafe technologies help protect not only the people inside your car, we also consider people on the outside. When you drive at speeds of up to 50km/hr, our City Safety collision avoidance technology looks ahead of you and brakes automatically if you're about to run into a vehicle in front.

And because we know you love to drive, our active IntelliSafe technologies like Electronic Stability Control add to reassuring driving stability in all conditions, without sacrificing the joy of driving. It's simply about giving you the most human driving experience, on your terms. And helping keep people out of harm's way, whether they happen to be inside or outside your car.

**SENSUS**

A great experience on the road should include both the way your car drives and the way you feel when you drive it. So, we developed Sensus, a suite of technologies to connect you with your car and the world around you. Each feature is thoughtfully designed, allowing you to control and personalize every aspect of the drive, because we want you to love your car as much on the inside as you do on the outside.

#### All-Wheel Drive (AWD)

The advanced AWD system with Instant Traction™ has an electronic management system that constantly monitors the speed of the wheels, the throttle, engine torque, engine speed and the brakes. As driving conditions change, wheels with the best grip get the most power. When a tyre loses traction, power is reduced to that wheel and instantly transferred to the more sure-footed wheels. This lets you stay in control even on the most dangerous and unpredictable roads.

**Dynamic Stability and Traction Control (DSTC)**

DSTC (Dynamic Stability and Traction Control) enhances driving stability in slippery conditions, by comparing the rotation of the drive wheels and varying the power supply as needed. The Advanced Stability Control (ASC) detects slowly built up skids at an early stage and compensates this with greater precision. Corner Traction Control (CTC) by Torque Vectoring balances the torque between the front wheels during acceleration while cornering – the torque is being re-distributed from a spinning inner wheel to the outer wheel – this reduces understeer and increases traction. This enhances stability when cornering at higher speeds.

### Hill Descent Control (HDC)

Hill Descent Control offers a smooth and controlled hill descent on steep, rough and slippery roads. Simply push the Hill Descent Control button and the vehicle will descend using the brake system to control each wheel's rotating speed. It also makes it easier to begin acceleration when towing a trailer or pulling a boat up a boat ramp. The technology also works in reverse gear.

The exterior colour you choose has a dramatic impact on the personality of your Volvo. But, no matter which you choose, each one imbues the car with a sense of luxury and presence.

“Our colour palette is very Scandinavian,” says Ebba Maria Thunberg, who is responsible for colours and material.

“When you look at our palette, you’ll find that it contains softer tones that are more connected with nature, with a few bold splashes.” Being Swedish, our designers are inspired by the ocean and the sky, but also by the shore and the way the light changes throughout the seasons. Every tone speaks of uniqueness, quality and charisma.

*"Our Park Assist Camera, front blind view allows you to 'see around corners' as you negotiate tight exits."*

## NO TWO LIVES ARE THE SAME. *Make sure your Volvo matches yours.*

The most pleasurable part of buying a new Volvo is putting your personal stamp on it. You can do that by choosing accessories that reflect your own taste and that cater to your particular lifestyle.

There's nothing more challenging than trying to negotiate tight exits and junctions with restricted visibility. Our Park Assist Camera, front blind view, takes the stress

out of these situations. It allows you to "see around corners" with a 180° field of vision to the left and right in front of you. The image is projected onto your seven-inch centre display so you know exactly who, or what, is approaching.

Our Park Assist Camera, rear, does the same job when you reverse. It's mounted on the boot lid and dramatically increases your

field of vision behind the car. The image is projected onto your centre display, so you can spot any low obstructions when manoeuvring. There's also a zoom-in view that you can use to hitch up a trailer to your towbar. It's so good, you might even start to enjoy the situations you used to dread.

*“Our Rear Seat Entertainment system with 8-inch touchscreens and integrated DVD players can operate independently.”*

Since there can only be one driver at a time, the S60 Cross Country also offers some premium amusements for your rear seat passengers. The Rear Seat Entertainment System with 8-inch touchscreens and integrated DVD players can operate independently. Wireless headphones are standard (you can also plug in your own wired headphones), so one's game doesn't

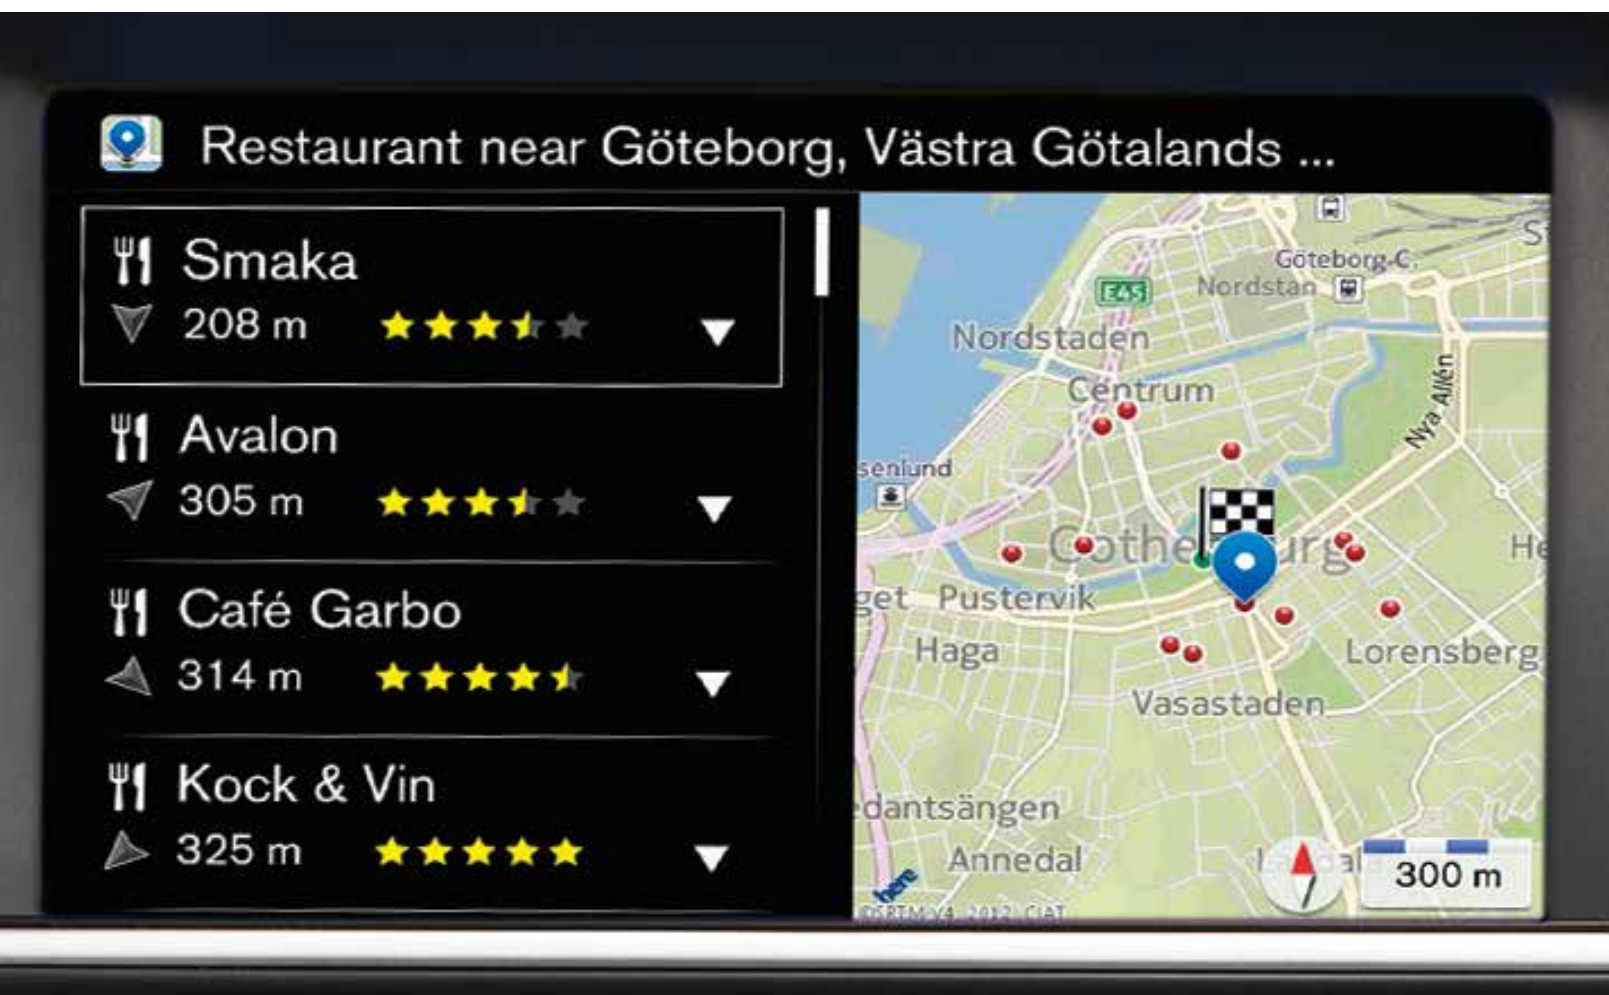

fight with another one's movie. By adding our illuminated instep plates, you'll enjoy a sophisticated welcome every time you open the front door and enter your S60 Cross Country – the Volvo logo embedded in the brushed stainless steel footstep lights up, together with the interior lighting.

## The beauty of information.

Find your ways and connect with our cloud-based apps that will guide you to the closest points of interest or a free parking

space. Select your destination with voice control or in advance by using your mobile phone. Map updates are included.

**Detachable tow bar.** This specially designed tow bar is easy to mount and remove. And to maintain your Volvo's good looks, there is a colour-coordinated cover for the tow bar opening.

**Luggage compartment mat, plastic.** Specially designed for your S60 Cross Country, this stylish plastic mat features a high-friction coating to stop your load from sliding around. It also prevents dirt and water from entering the luggage compartment.

**Roof load carriers.** Blending harmoniously with your Volvo's styling and technology, these specially designed load carriers are easily fitted to provide an easy-to-use rooftop carrying system.

**Tow-bar mounted bicycle holder.** Our compact new tow-bar mounted bicycle holder is very easy to use and holds up to two bicycles. When not in use, it's easily stored in your car or at home.

# The simplest way to own a car.

We love it when you're happy. When things are easier than you expect, or go faster and become better. Because when you buy a Volvo, you buy the simplest way to have a car. Financing, insurance, servicing, changing tyres, cleaning – those aspects of car ownership that you might not find very interesting, are the ones that we love to make easier and better for you. That's why your

Volvo Car dealer will always offer you a whole range of simplifying services and offers all designed around you, giving you the most carefree ownership experience possible. Still, this is just the beginning. Through our uniquely Swedish approach to innovation, we continuously find new ways to make your life simpler. For instance, the Connected Service Booking function, which lets you book an

appointment just by pushing a button in your car or the new way of working in teams – like in a racing pit-stop – that is gradually being introduced in Volvo Car workshops all over the world. We call it Volvo Personal Service and it will make your workshop visits much shorter and more convenient. In the future, servicing your car will be so much simpler.

## BUYING & OWNING

- Extended Warranties
- Insurance
- Service Contract
- My Volvo Website

## MAINTENANCE & SERVICES

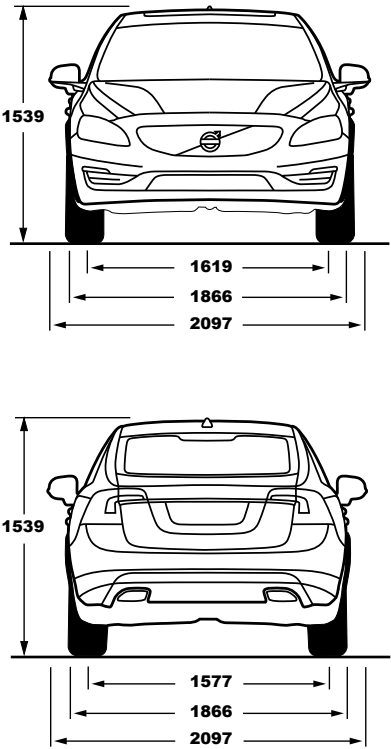

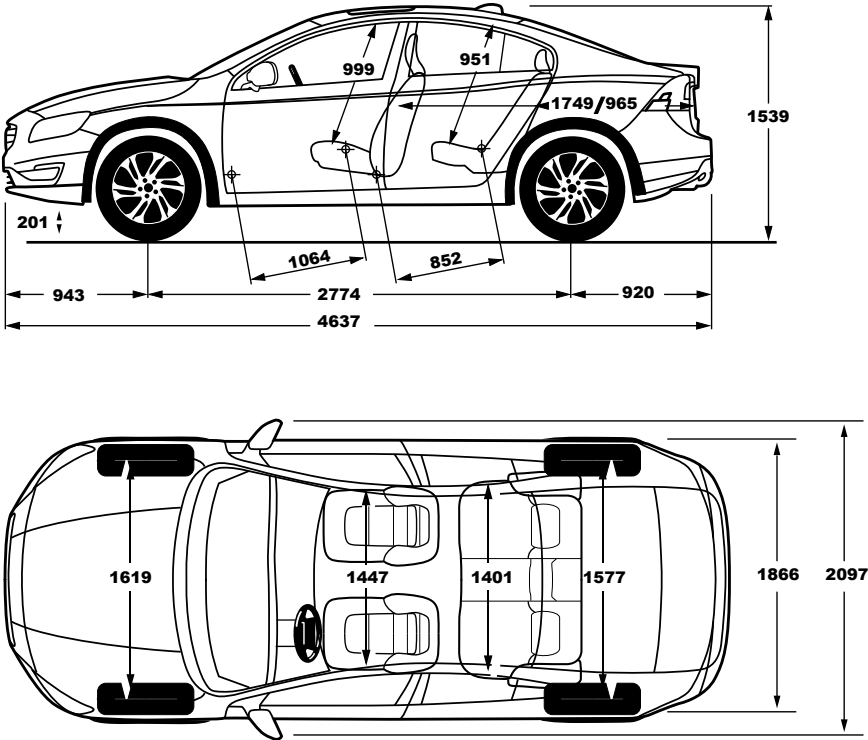

- Volvo Genuine Service
- Volvo Professional Car Care
- Tyre Services

## IF SOMETHING HAPPENS

- Volvo Assistance
- Repairs
- Volvo Glass Services
- Volvo Dent Repair
- Car Climate Services

\*Available depending on introduction date. Please contact your Volvo Car dealer.

**Please note:** Some of the information in this brochure may be incorrect due to changes in product specifications that may have occurred since printing. Some of the equipment described or shown may now only be available at extra cost. Before ordering, please ask your Volvo Car dealer for the latest information.
